Note: Pre-Match positions may differ from post-Match positions because some programs elect to move (revert) unfilled positions in the Match to another program, in an attempt to fill the available positions in the other program. For example, a residency program may revert its unfilled positions in the Match to a traditional rotating internship. This would decrease the number of positions reported post-Match for the residency program and increase the number of positions reported post-Match in the traditional rotating internship.
