

NYIT Non-Clinical Research Activities

All principal investigators will be required to meet with Arline Allera, the Academic Health Care Center (AHCC) research coordinator, or Joanne Donoghue, AHCC clinical research director, to review safety procedures for Non-Clinical Research for their specific protocol.

1. Use current campus-specific COVID-19 guidelines from the [Campus Access Policies](#) as designated by NYIT.
2. All investigators will wear a facemask during all human subject contacts.
3. All human subjects will be required to wear a facemask but nothing with a vent. Subjects will be requested to use the provided hand sanitizer before beginning any research activities/procedures.
4. After each human subject leaves, all contact surfaces will be wiped down with germicidal wipes. Contact surfaces include doorknobs, chairs, mats, and other objects with which the human subject or investigator(s) may have come into contact.
5. All clinical investigators and other researchers on the protocol including students will be required to complete the CITI training [Covid-19: Back to Campus \(Fall 2020\)](#).
