

CONNECT TO NYIT WI-FI USING MICROSOFT WINDOWS

STEP 1: Double-click on  and select the **NYIT Wi-Fi** network from the list of open networks. Make sure the **Connect automatically** box is checked.
Please note: All students, faculty & staff should use the NYIT Wi-Fi, NYIT-Guest should only be used for visitors for temporary Wi-Fi internet access.

STEP 2: A browser will open and you will need to follow the prompts to connect. You will be given 3 choices:

- **Students, Faculty & Staff** – If you have a New York Tech username and password.
- **Extended guest accounts** – If you have set up an account with Information Technology Services (ITS).
- **Gaming devices** – If you are registering your console.

STEP 3: A **Dissolvable Agent** may download to scan your computer and verify that your anti-virus protection and operating system are valid and up-to-date. If your computer does not meet the above requirements, you will be provided a link to **Sophos Home Free** to resolve this issue. If your computer meets the above requirements, you will receive a message that your device is connecting to the network and a progress bar will launch indicating a successful registration.

STEP 4: Restart your machine.

For further assistance please contact Information Technology Services (ITS) at servicecentral@nyit.edu or 516-686-1400.
