

How do I connect my game console to the NYIT Wi-Fi Network?

Step 1: log onto <https://wifi-registration.nyit.edu/>.

Step 2: Agree to the terms of usage.

Step 3: Select gaming devices:

Step 4: Locate the Mac Address by following the directions on the Left hand margin of the page.

NYIT Network Access Control **REGISTRATION**

How to find the MAC

- [Nintendo DS](#)
- [GameCube](#)
- [Nintendo Wii](#)
- [PlayStation 2](#)
- [PlayStation 3](#)
- [PSP](#)
- [XBox](#)
- [XBox 360](#)

Registration

Here you can register your xBox, Playstation2 or GameCube on the Network.

You are permitted to register 2 devices on the Network. Please call the extension below if you need to add more devices or remove old devices that are not in use anymore.

NOTICE: Game Console users must use a hub or switch for online gaming. Routers are not allowed.

1. Plug your Xbox, PS2 or GameCube into the network and start it up with an online game.
2. If you are plugged into a hub in your room, unplug the ethernet cable going from the wall to the hub or switch (routers are not allowed), wait 5 seconds, then plug the hub back in.
3. Locate the current ip address or mac address of the console and copy it down. For instructions on obtaining your Mac address, [click here](#).
4. Enter your Network ID and password, and the current IP address or mac address of your Xbox/PS2/GameCube below, and click on "Register".

Game Console Registration

User Name

Password

MAC Address
e.g. AA:BB:CC:11:22:33

(or IP address)
e.g. 192.168.10.10

Device Type:

If you need assistance, please contact Service Central at 516-686-1400.

Step 5: Fill in your NYIT user name, password, Mac address and select the device type

Step 6: Select register.
