**Algeria**

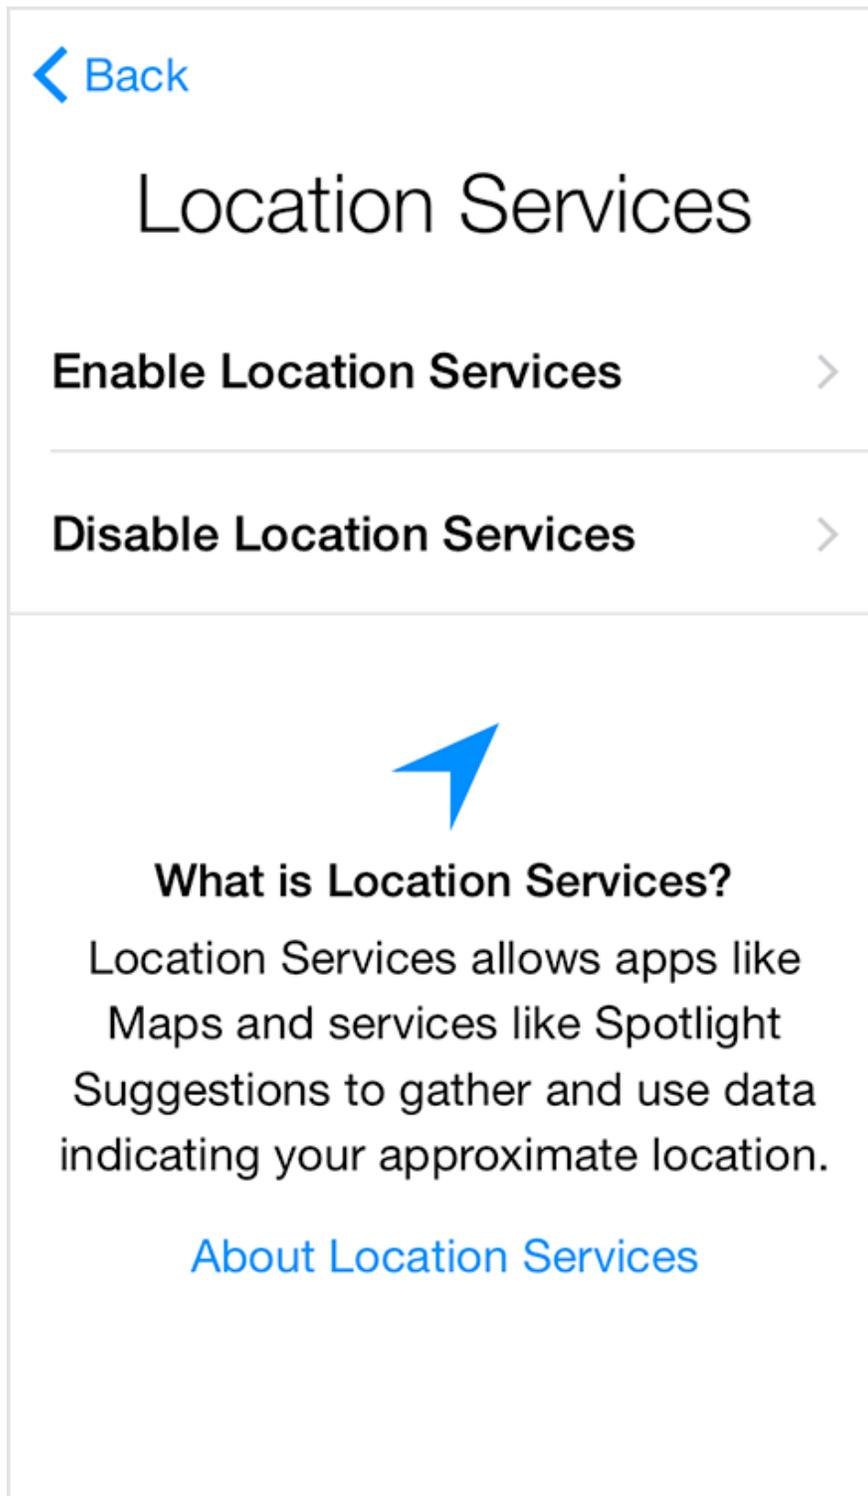

3. Your iOS device requires an Internet connection to set up. Tap the name of your desired Wi-Fi network to begin device activation.

- If you're activating an iPhone or iPad (Wi-Fi + Cellular) with active cellular service, you can instead choose cellular activation.

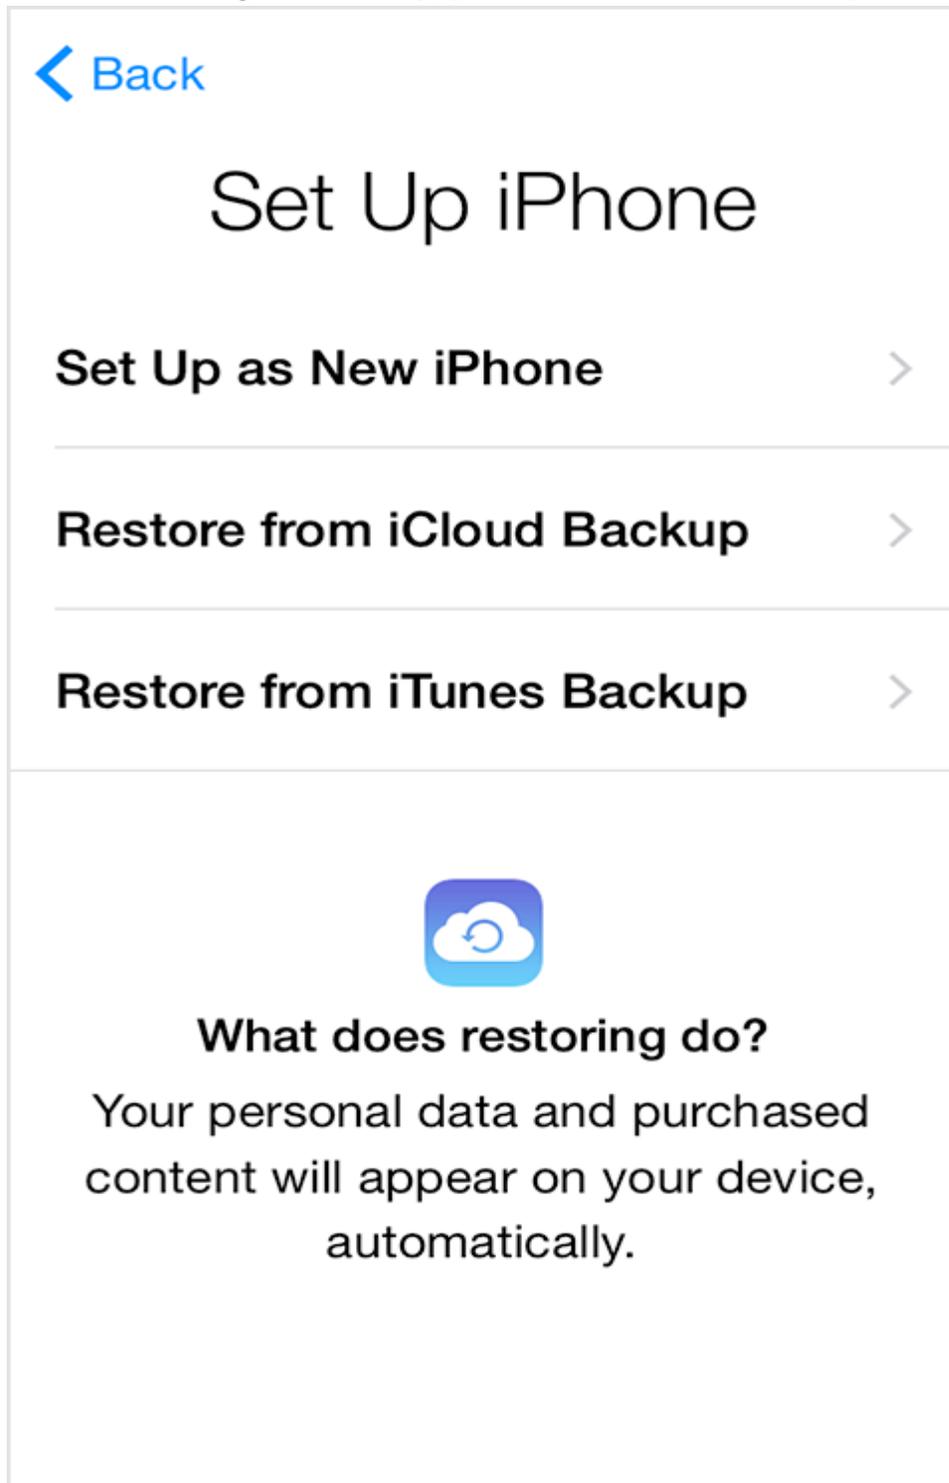

4. Choose whether to enable Location Services.

5. Set up your iPhone as a new device, from an iCloud backup, or from an iTunes backup.

- If restoring from backup, you can learn [how to restore your content](#).

6. Sign in with your Apple ID, which you've created previously, or create a free Apple ID.
  - Alternatively, you can tap Skip This Step to sign in or [create an Apple ID](#) later.

## What is an Apple ID?

An Apple ID is your secure login for just about everything you do with Apple.

Get access to the best selection of apps with the App Store.

Shop for music, movies, TV shows, and more in the iTunes Store.

- If necessary, learn how to create a free Apple ID:

1. Select your birthday, then tap Next:

[← Back](#) [Next](#)

## Birthday

Your birthday is used to determine appropriate services and retrieve your password if you forget it.

<b>Birthday</b>	4/1/80	
January	29	1977
February	30	1978
March	31	1979
<b>April</b>	<b>1</b>	<b>1980</b>
May	2	1981
June	3	1982
July	4	1983
August	5	1984

2. Enter your first and last name, then tap Next:

The screenshot shows the 'Birthday' setup screen on an iPhone. At the top left, there is a blue back arrow and the word 'Birthday'. At the top right, there is a blue 'Next' button. The main heading is 'Name'. Below this, there are two input fields. The first is labeled 'First Name' and contains the text 'John'. The second is labeled 'Last Name' and contains the text 'Appleseed'. A blue cursor is visible at the end of the 'Last Name' field. At the bottom of the screen, a standard QWERTY keyboard is displayed, including keys for numbers, a smiley face, a space bar, and a return key.

3. You can then use either your current email address, or choose to get a free iCloud email address. Select the option you'd like, then tap Next.

4. Enter your current email address, or what you'd like for your iCloud email, then tap Next.

5. Enter what you'd like for your password and tap Next.

6. Enter your security questions and answers, tapping Next after each.
7. If you like, enter an alternate email address to be used as a "rescue email". Tap Next after you have done so, or if you chose not to use one.
8. Select whether you'd like email updates and tap Next.
7. If you agree to the terms and conditions of your iOS device, tap Agree.

- If you'd like to have the terms and conditions emailed for later review, tap Send by Email, confirm the email entered is correct, then tap Send.

8. Choose whether to upgrade your iCloud account to use iCloud Drive. This allows you to store your files in iCloud and access them anytime on all your devices.

iCloud Drive requires iOS 8 and OS X Yosemite. If you upgrade your account, any documents currently stored in iCloud will move to iCloud Drive. You'll be

able to access them only from devices with iOS 8 or Yosemite.

# iCloud Drive

Store your files in iCloud and access them anytime on all your devices.

**Note:** You will not be able to access the documents currently stored in iCloud on your other devices until they are also upgraded to iOS 8 or OS X Yosemite.

## About iCloud Drive

Make edits on any device or any app,

9. With an iCloud account set up on your device, you can use [Find My iPhone](#).
10. Set up iMessage and FaceTime on your device.
11. With iPhone 5s and later, you can set up [Touch ID](#) to use your fingerprint in place of your passcode or Apple ID password for purchases.
  
12. To protect your data, you should create a passcode for your device. You'll use it to unlock your device. If you don't need a passcode, tap Don't Add Passcode.
  - If you choose to use Touch ID, you must enter a passcode.
  - To make sure you did not make a mistake, you need to enter your passcode twice.
  - If you chose a commonly used passcode, you'll be asked to choose a more secure one.

- If you need to use a complex passcode, you can set it in Settings > General > Passcode after completing this assistant.

[← Back](#)

## Create a Passcode

A passcode protects your data and is used to unlock iPhone.
